CEO: **Claire TILLEKAERTS**

Delegates: **Marianne TEMMERMAN & Kristof CUVELIER**

The **Flanders Investment & Trade** agency promotes sustainable international business, in the interest of both Flanders-based companies and overseas enterprises.

Whatever sector you are involved in, **Flanders Investment & Trade** will help you establish contact with the Flemish companies you are looking for. This includes not only products or services you may be sourcing, but also various types of business relationships, from joint ventures to technology transfers.

At another level **Flanders Investment & Trade** enhances Flanders' position as the gateway to Europe for inward investors. The agency identifies, informs, advises and

supports overseas enterprises by establishing production and research facilities, contact centers, headquarters, logistics operations and the like in Flanders, the northern region of Belgium.

This broad focus on international entrepreneurship, involving outward trade as well as inward investments, requires not only a thorough knowledge of the Flemish economy, but also an extensive network outside of Flanders.

We have just that for you. Do visit our website and discover our worldwide network. With over 100 offices we are bound to be conveniently located near you, wherever you are.

Coordinator: **Carine BOONEN**

Delegates: **Linda AERTS, Lieve APERS, Carine BOONEN & Fabian DOMINGUEZ**

Flanders' Care is a dynamic and ambitious multi-stakeholders framework set out by the Government of Flanders with the aim to **measurably improve the quality of care** through **innovation** and **responsible entrepreneurship**. So **Flanders' Care** is set out in order to stimulate maximum societal and economic added value. Cross-fertilization between care facilities, care providers, care users, research centers and the business community, creates an environment for efficient cooperation and optimal decision making.

Cutting edge pilot projects are set up to experiment with new business models. In this broadly supported future oriented pact, our top-notch strategic research centers keep us on track. **Flanders' Care** offers a unique access to governmental and Euro-

pean frameworks together with a tailor made support in every step of the innovation cycle. Living labs, end users panels, an evidence based toolbox kit, demonstration projects and investment funds, together with fitting competences and highly skilled people, foster implementation of innovation. Focus lies on assistive technology, infrastructure, ICT, e-health, m-health, telemedicine, prevention, personalized health-care and precision medicine.

Ranking among the top regions of Europe and standing out as an economically sustainable and caring society, **Flanders' Care** reaches out to the world and is seeking for international partnerships, as challenges in healthcare industry are the same throughout our globalizing world.

CEO: **Pascale DELCOMMINETTE**
Delegate: **Gisèle MARIEN**

The **Wallonia Export-Investment Agency (AWEX)** is the institution in charge of the development and management of Wallonia's domestic and international economic relations.

Through a personalized, innovative, and sustainable approach, **AWEX** supports Wallonian companies - regardless of their size, sector, or target market - in every step of their international endeavors. This includes exports, technological partnerships, and development abroad.

The agency's vast network of connections ensures the best advisors are always by your side. Our local anchors and agents abroad are capable of providing unparalleled insight to take your company to the next level. In addition, our connections will help establish

your business in the global marketplace and promote it throughout the world. Training, incentives, and international financing are also available.

AWEX is also committed to strengthening Wallonia's position as the premier gateway for international investors seeking success in the heart of Europe. We work closely with them to inform, convince, and advise in every stage of their development.

Feel free to get in touch with one of our local or international agents via our websites listed above. In our network of more than 400 employees in nearly 100 countries around the world, there is always someone ready and willing to support you in your approach.

Feel inspired

The Brussels Business Support Agency is offering free-of-charge a range of solutions and advice for start-ups and scale-ups in Brussels and beyond, as well as services focussing on strategy, finance, clustering and internationalization.

One of the missions of **hub.brussels** is indeed to facilitate the internationalization of Brussels' economy by helping Brussels businesses compete in global markets. More than 90 economic and commercial attachés located on every continent provide free support to SMEs, approach potential local prospects and partners, organize networking events...

Concrete initiatives in Brussels and abroad include trade missions, networking days, invitations for decision-makers, and the organization of shared exhibits at international trade fairs. In addition, **hub.brussels** also works to attract foreign investors to Brussels, providing them with assistance in establishing their business in Europe's capital.

A "Welcome Package" is available to potential investors, providing them with fully equipped office space for three months and a wide range of services so that they can experience the advantages of setting up business operations in Brussels

Keywords:

3D Printing • 3D communication interface with the medical world • Patient specific Implant • Orthopaedic surgery • Advanced 3D Planning

Activities:

3D-Side links surgeons to 3D-technology thanks to 3D-software, 3D-printing and surgical knowledge, making patient-specific treatments possible. After years of industrialization of their products, **3D-Side** also developed a web-based platform "Customize" to efficiently design and produce custom-made devices.

Products, Solutions and Services:

3D-Side provides medical companies with a web platform, "Customize" to efficiently market custom-made devices. From images to 3D-printing, this web-based Software as a Service solution (SaaS) consists of 3 modules: "Interact" to communicate easily with the medical team, "Create" to design custom-made instruments/implants and "Supervise" to manage the just-in-time manufacturing. Alongside this service, **3D-Side** markets two major products: custom cranial implants and instruments for complex bone surgery.

Keywords:

Fall detection • Quality of care • Artificial Intelligence • IoT

Activities:

As a specialist in the behavioural analysis of elderly people, we have developed a technological approach to detecting falls and improving the quality of care.

Products, Solutions and Services:

Using a 3D sensor, ISA, our product, detects all falls whether they are high or low-impact. It uses movement-tracking algorithms to recompose the image that has been captured. The automated fall register enables falls to be viewed after they have taken place.

Keywords: Oxygen Therapy • Flowmeter • Innovation • Hospitals • Patient Comfort • Smart Patient Companion • Digital Vital Signs

Activities: **Oxypoint** is a Belgian scale-up that breaks the habits of oxygen therapy in hospitals by developing innovative solutions for a higher quality of care: more patient comfort, less workload, better therapy (loyalty) and optimal oxygen consumption.

Products, Solutions and Services:

With O2COMFORT™, **Oxypoint** developed the first hospital oxygen flowmeter that not just contributes to the well-being of the patient but moreover pays for itself. This Medica fair, **Oxypoint** will introduce its digital O2MATE™ product and its associated software platform. By automatically capturing the patient's vital parameters and by applying smart data analysis, O2MATE™ is able to not only reduce the administrative burden for the nursing staff but also provide oxygen therapy specifically tailored to the ward or the patient. O2MATE™ is the first oxygen therapy device bringing substantial advantages for patient and hospital alike even when oxygen is not being administered.
